

AF Combination Spanner Set 3/8" - 11/16" 6pc

"A good value set of Imperial (AF) Bi-Hex (12pt) combination spanners in a range of common sizes. Particularly useful for British and American classic car maintenance, where using a standard metric spanner could cause nut or bolt damage. The tools have a satin body finish and polished jaws for a practical, classic look. Manufactured from chrome vanadium for strength and durability these spanners are designed for years of reliable service. The Bi-Hex (12pt) profile has a 15 degree offset head making it quick and easy to access fixings even in tight spaces. A great small selection for home use supplied in a handy storage clip."
