

Drill Pump

A drill powered pump designed to extract and transfer fluids quickly and easily. A simple and effective design, the 6mm pump shaft can be driven by any electric drill with a max operating speed of 2800rpm. Arrows show the direction of flow to ensure correct alignment and the push-fit, barbed inlet and outlet points make for easy hose attachment. Ideal for workshop and home use, from emptying tanks to cisterns.

Additional Information

- Drill pump for extracting fluids easily. For use with most electric drills. Max rpm: 2800rpm.
- 6mm x 1/4" shaft drive.
- Push fit ridged 1/2" inlet and outlets (use with/without hose clips).
- Suitable for water and diesel. Please note: due to the risk of sparks from the drill this is not suitable for use with petrol.
- Composite body. Compact size 75mm wide, 40mm deep.
