

Extension Raccord rapide - Flexible 300mm

A flexible extension providing 300mm reach for driving any standard 1/4" shank bit with a cordless drill. The flexi-shaft gives access to tight, restricted areas, that you otherwise wouldn't be able to get a drill into. And, for ease of use, the bit holder is magnetic so the bit will remain in place even if the release collar is pushed back when being used.

Additional Information

- Longueur 300mm
- Excellent lorsque l'aces est restreint
- A ne pas utiliser en mode dvissage , ni dans une visseuse trop puissante
- porte embout magnique
- Couple maximum autorisé 8Nm
