

Trichterkit 3-teilig

Specialist funnel designed for automotive use. A versatile kit, includes a 165mm diameter funnel that can be used on its own or attached to the flexible spout or clear hose. The flexible spout is 480mm long, a useful size for many re-fuelling applications. The clear hose has a diameter of 9.5mm and is 600mm long, designed for the most inaccessible areas, such as topping up windscreen washer fluid or accessing hidden brake or clutch fluid reservoirs. The funnel features an ergonomic side handle with a thumb and finger grip for a secure hold and is oil and fuel resistant, making it ideal for the professional workshop.
