

Cambelt Tool Kit - for Renault, Volvo Petrol Twin Cam

This kit provides the tools to set the camshafts and crankshaft when replacing the cambelt; also includes a front pulley holding tool which is essential when undoing the very tight front pulley bolt fitted to these engines.

Additional Information

- For Renault and Volvo with petrol twin cam engines.
- Applications include the Renault 2.0 and 2.4L 16v petrol engines (1996 to 2001) plus Volvo 1.6, 1.8, 2.0, 2.3 and 2.4L petrol engines (from 1997-2010).
- Suitable for use with the following replacement cambelt kits INA 530006310, Contitech CT979K1 and Gates K015509XS.
- Made in Sheffield.
