

Ultrasonic Cleaner 13L - with Euro plug

The ultrasonic cleaner uses high frequency sound waves to create millions of tiny bubbles which cause a scrubbing action against surfaces and in cavities, which loosens and removes dirt. The large 13 litre capacity of the fluid tank enables the cleaning of automotive components such as dismantled carburettors, brake parts, etc.

Additional Information

- Tank size: 335 x 325 x 150mm, capacity: 13L; basket size: 290 x 275 x 92.5mm.
- Time setting: 0 - 30 minutes (adjustable); temperature setting: 20° - 80°C; power: 400w. For best results use deionised water and the correct cleaning additive.
- Fitted with a cooling fan and drainage valve.
- Manufactured from stainless steel.
- CE, UKCA & RoHS compliant.
