

T-Handle JIS Screwdriver

T-handle JIS screwdriver, complete with 6 x JIS screwdriver bits and a magnetic bit holder. Similar in look to a Phillips[®] screw, JIS screws are commonly found on Japanese equipment and are designed not to allow the screwdriver to slip out of the screw head.

Additional Information

- For use on Japanese Industrial Standard (JIS) screws as used on Japanese products and vehicles such as Honda, Shimano bike components, Tamiya radio controlled cars etc. The use of the correct bit helps prevent cam out and damage to the screw heads.
- JIS Fixings are usually identifiable by a single dot or an "X" to one side of the cross slot.
- T handle manufactured from Chrome Vanadium CV6140. Size: 100 x 150mm.
- 6 x JIS bits No 1, 2, 3. Manufactured from S2 material. Supplied with standard 1/4" magnetic bit holder.
- JIS Screwdriver Set 4pc also available - see Laser Part No. 7036.
