

Electric Vehicle Charger - 240V Portable

A compact and portable mains charger for charging any EV (Electric Vehicle) and PHEV (Plug-in Hybrid Electric Vehicle) that uses a type 2 connector from a domestic (UK) 3-pin socket. It features a 5 metre long cable, has adjustable amperage to prevent circuit over load and is supplied in a zip-up carry-case so that it can be kept safely and tidily in the vehicle when not in use. Suitable for use on: Audi, BMW, BYD, Chevrolet, Hyundai, Jaguar, Kia, Land Rover, LEVC, Mahindra, MG, Mercedes-Benz, Mini, Nissan, Polestar, Porsche, Renault, Rimac, Smart, Tesla, Toyota, Volvo and Volkswagen.

Additional Information

- Portable 240V Mains EV and PHEV Charger 8A-13A with a Type 2 (IEC 62196-2) vehicle plug, complete with carry bag.
- Adjustable current to 8A, 10A or 13A (refer to instructions). Input voltage 220 to 250v with a 3 pin standard UK mains plug.
- Resistance voltage: 2000V; insulated resistance >1000 MOhms; contact resistance < 0.5 mOhms.
- Fire rating UL94 V-O; waterproof rating IP54; working temperature -30°C to 50°C. Cable specification 3 x 2.5mm², + 2 x 0.5mm². Charging gun cable length: 4.5m. Complete with 0.5m cable with BS Mains connection.
- Protection against overheating, overvoltage, overcurrent, overcharging and electric leakage. CE, GS TUV and UKCA & RoHS compliant. WARNING: if using with extension lead, ensure extension lead load rating is not exceeded and that the lead is fully extended.
