

Turbo System Tester Set

A 13 piece turbo system tester set to identify any pressure leakage within the turbo system using standard workshop air. To fit most turbo systems on cars and light commercial vehicles.

Additional Information

- Twelve stepped adaptors for pipe sizes: 31 - 38mm, 46 - 51mm, 55 - 60mm, 65 - 70mm, 75 - 80mm and 85 - 90mm.
- Pressure gauge with shut off valve and regulator to help prevent over-pressurisation.
- Use to pressure test turbo pipes, intercoolers, cooling system pipes & radiators when looking for leaks.
- Use with workshop compressed air - NB always pre-set the regulator to low before use.
- Suitable for cars, LCV, HGV and marine systems.
