LASER®

Brass Drift 200mm x 20mm

Brass drift for knocking out bearings, shafts and gearbox components etc, reducing the risk of damage.

Additional Information

- Size: 200mm long x 20mm diameter.
- · Ideal for removing outer bearings rings and driving in shafts without damage.
- Brass material reduces the possibility of damage to steel components. •
- A handy addition to any bearing removal and fitting kit. Particularly useful for gearbox work. •
