

Vehicle Battery Tester 12V

A 12V battery tester designed to test battery health and predict battery life. An ideal tool to assist the inspection and maintenance of the electrical system of the vehicle.

Additional Information

- Suitable for voltage 12V (9V - 15V) normal lead acid battery, sealed maintenance free battery, maintenance free battery, standard type battery, EFB batteries and AGM batteries.
- Functions: CCA testing - SAE, DIN, EN, IEC, CA; battery voltage and charging voltage when engine is starting.
- Accuracy: +/-0.05V; reverse polarity protection up to 20V DC; operating temperature: 0°C - 50°C.
- Display: LCD with back light.
- Supplied with a protective rubber boot. CE & UKCA compliant.
