

Impact Universal Joint 1/2"D

Impact quality 1/2"D universal joint features a special design that allows strong, smooth torque at every angle. The narrow profile combined with the 40° working angle and 360° rotation ensures that this swivel socket adaptor is ideal for use on fixings that have very limited access in engine bays and confined spaces.

Additional Information

- 1/2"D universal joint with spring loaded detent ball firmly connects socket
- 40° working angle with 360° rotation allows increased access in difficult access locations.
- Drilled head to accept retaining pin or detent ball.
- Manufactured from chrome molybdenum with black phosphate finish.
- Meets Ansi and DIN standards.
