

2-in-1 Moulding Removal Tool

Designed for use with a mallet or air hammer, the Laser 8250 is designed specifically for the fast and effective removal of vehicle panel trim mouldings.

Additional Information

- Non-marring, paint friendly, tough plastic chisel blade.
- Progressive wedge angle reduces the effort required to separate the double sided mould fixing from the vehicle panel.
- Blade shape makes it easier to get under vehicle mouldings and badges to help removal.
- The high impact materials used allow for both mallet and air hammer use.
- Interchangeable air hammer and manual handles.
