

Oil Funnel Set - for VAG

An oil funnel set complete with a 2 piece funnel and 3 adaptor caps sized to fit various vehicles from the Volkswagen Audi Group. The assembled funnel is connected directly to the oil filler neck using the correct adaptor for the vehicle. This forms a tight seal, allowing for both hands to be used to hold or steady the engine oil bottle if needed. This provides a fast and effective way to re-fill or top-up vehicle engine oil, eliminating any unsafe oil spills and mess.

Additional Information

- Funnel with chamber and adaptors provide a secure connection to the tank for convenient hands free operation.
- Applications include: Audi, Seat, Skoda and VW models.
- Dimensions: funnel diameter: 125mm; height (from base of adaptor collar): 220mm; chamber diameter: 27.5mm. Funnel and adaptor threads: M37 x P3.0.
- Transparent chamber shows oil flow; wider diameter to standard funnels allows oil to flow more rapidly.
- Screws directly into the oil filler neck to help avoid oil spills on to the engine, allowing for quicker, cleaner filling.
