

Oil Funnel Set - for Renault, Nissan

An oil funnel set complete with 2 special adaptor caps to fit various vehicles from Nissan and Renault. Once assembled, the funnel is connected directly to the oil filler neck using the correct adaptor for the vehicle. This forms a tight seal, allowing for both hands to be used to hold or steady the engine oil bottle if needed. This provides a fast and effective way to re-fill or top-up vehicle engine oil, eliminating any unsafe oil spills and mess.

Additional Information

- Funnel with chamber and adaptors provide a secure connection to the engine for convenient hands-free operation.
- Applications include: Nissan and Renault models using 1.5, 1.6 and 1.9L dCi engines; Renault Clio and Modus 1.5L dCi with the dipstick in the oil filler cap (OEM cap number 8200355344).
- Dimensions: funnel diameter: 125mm; height (from base of adaptor collar): 220mm; chamber diameter: 22.5mm. Funnel and adaptor threads: M33 x P3.5.
- Transparent chamber shows oil flow; the wider than standard diameter allows oil to flow more rapidly.
- Screws directly into the oil filler neck to help avoid oil spills onto the engine, allowing for quicker, cleaner filling.
