

Folding Suspension Height Gauge - Motorcycle

Suspension set-up is often thought of as the “black art” of the motorcycling world and is often ignored. The Laser Motorcycle suspension height and sag gauge has been designed to make setting and tuning your motorcycle suspension easier. This dedicated folding gauge allows the user to check and set the unloaded static height, suspension sag and loaded travel to ensure best use is made of the motorcycle suspension system.

Additional Information

- Adjustable, folding suspension scale.
- Ideal for setting up front and rear suspension on road, race and off-road motorcycles.
- Can be used to measure ride height and sag.
- 760mm extended length with sliding cone to locate on the wheel centre; 120mm measuring range.
- Use with Laser Motorcycle Stand/Wheel Chock (Part No. 5671) to keep the bike vertical.
