

Impact Socket 1/2"D 41mm

A metric 41mm, 1/2"D, impact socket suitable for use on the 12 point (bi-hex) fixing nuts that hold the lower ball joint into the suspension arm on BMW 5 and 7 series models from 2013. The design of 12pt flange nuts allow for greater torque to be applied to a joint compared with standard hex nuts without slipping or rounding.

Additional Information

- Size: 41mm 12-point x 1/2"D.
- Standard impact socket, depth: 52mm.
- Applications include: BMW 5 and 7 series vehicles (from 2013); used to remove the 12 point holding nut that holds the front lower ball joint in place.
- Manufactured from chrome molybdenum with black phosphate finish.
