

E-Clip Installation Tool

Clip tool suitable for use with for 'E' and 'C' type clips, featuring a magnetic clip holder together with an ergonomic handle with a pound through design allowing for the end of the tool to be stuck with a small hammer to help push the fixing into position on the shaft. The design allows better access options on difficult to reach clip grooves.

Additional Information

- For use on E-clips (size range E9 to E13).
- Also suitable for use on C-clips fitted to universal joints.
- Features an integral magnet to hold the clip in place.
- Pound thru design with ergonomic handle for ease of use.
- Suitable for use with Connect Workshop Consumable E clips, Part No. 35007.
