

Cylinder Head Bolt Star Socket 1/2"D – for PSA EB2

Extra-long slim fit star (E12) socket specifically introduced for the PSA EB2 series of engines that use E12 cylinder head bolts. Access to the cylinder head bolts is very restricted. Even after removal of the camshafts a standard E12 socket cannot be used. The Laser 8718 sockets slim fit design and length allow the user to easily access the head bolts.
