

Cable Cutter

A pair of cable cutters designed to cleanly cut through cables, including starter motor and battery main cables up to 10mm diameter. They feature two different sets of cutting jaws; one suitable for use on coaxial cables, with the other suitable for steel and aluminium clad cables. Suitable for use by mechanics, electricians, auto electricians and DIYers.

Additional Information

- Suitable for starter motor & battery main cables up to 10mm diameter. Also suitable for coaxial aerial cables.
- Jaw capacity 10mm, overall length 171mm, Features spring-loaded cushion grip handles, with locking function.
- Curved main jaws allow for cutting without flattening or damaging the cabling.
- Straight safety blade under handle for cutting steel & aluminium clad cables.
- Multi-purpose wire stripper, crimper & cutter also available. Please see Part No. 8785.
