

Flexi-Head Adjustable Wrench 14 - 32mm

An adjustable wrench with spring-loaded jaw, serrated teeth, and a flexible head for easy access to hard to reach fixings. Its simple pull back action allows a quick and firm grip on fixings from 14mm to 32mm in diameter. Manufactured from chrome vanadium, they are particularly good on damaged or rounded-off fasteners.

Additional Information

- Quick adjustment wrench with serrated teeth for firm grip on even the most rounded fixings. Also features a lockable flexi-head for greater access.
- Overall length: 240mm. Range: 14 - 32mm.
- For use on all types of bolts, including Single Hex (6pt), Bi-Hex (12pt), Star/Torx, Spline, Square etc.
- Manufactured from chrome vanadium (CRV 6140) for strength, with a cushion grip handle.
- Smaller size also available, please see Part No. 8729 (Range: 8 - 17mm).
