

Digital Automotive Multimeter - CAT III/IV

A digital multimeter equipped with 15 functions including VDC, VAC, amps AC, amps DC, Ohms, RPM, dwell, duty cycle, frequency, 2x temperature, capacitance, pulse width, diode check and continuity test. Supplied with infrared temperature module that allow the user to measure temperature and temperature changes from up to 800mm away, ideal when checking cooling systems, A/C system and even EV battery surface temperatures. It also features an integral flip down stand for ease of use, and comes supplied in a protective carry case.

Additional Information

- Features a large scale (20mm) main readout with bar graph & switchable back light.
- Data hold, switchable auto-range, minimum & maximum reading options as well as peak, allowing data to be collected & recorded while not viewing the screen.
- Supplied with an induction pickup for RPM functions.
- 2x method temperature method - non-contact using infrared module or contact using thermocouples provided.
- Also supplied with test leads, carry case & 9V battery. CE compliant. CAT III/CAT IV.
